

**No child dreams  
of becoming an  
unhealthy adult.**

**BlueCross BlueShield  
of Oklahoma**

# Oklahoma's children have the right to grow up to be strong and healthy adults.

Oklahoma is facing a crisis in the health of our children. According to the State Department of Health, only one in three children is fully vaccinated against preventable diseases that can lead to sickness, disability and even death.

Blue Cross and Blue Shield of Oklahoma is working to protect our children. Through the Oklahoma Caring Van Program, mobile immunization units are traveling across the state, providing free childhood immunizations from registered nurses.

To learn more about the program and find out when the vans will be in your area, call (405) 316-7250.
