

Name: Asher Clift

Grade: 2nd

BE SMART- DON'T START!

In 2004, 11% of mothers
smoked while pregnant.
Harmful chemicals are
passed to the baby
causing birth defects and
even death.

20-30% of teens smoke.
Nearly 100 of these will
die from smoking.
Kids whose parents
smoke are 2X as
likely to smoke.

More than 53,000
people die from
secondhand smoke
every year.

Smoking kills $\frac{1}{2}$ a million
people a year in
the U.S.
My grandpa smoked...
I really miss him.

Working Together for a Healthier Oklahoma!
Special thanks to contest sponsor, Lamar Advertising Company, for in-kind donations of outdoor advertising.
